Mon, 10 Dec 2018 10:13:00 GMT HTT Heat Transfer Educational Software - Heat transfer physics describes the kinetics of energy storage, transport, and energy transformation by principal energy carriers: phonons (lattice vibration waves), electrons, fluid particles, and photons. Heat is energy stored in temperature-dependent motion of particles

including electrons, atomic nuclei, individual atoms, and molecules. Heat is transferred to and from matter by the ... Thu, 06 Dec 2018 20:26:00 GMT Heat transfer physics - Wikipedia - In thermodynamics, heat is energy transferred from one system to another as a result of thermal interactions. The amount of heat transferred in any process can be defined as the total amount of transferred energy excluding any macroscopic work that was done and any transfer of part of the object itself. When two systems with different temperatures are put in contact, heat flows spontaneously ...
